DIGITAL PRINTING

UNIQ® JET series products are the polymeric dispersants which are specifically designed for digital inkjet application. UNIQ® JET products can be recommended in the application including solvent based inkjet, water based inkjet and UV inkjet. In all these application, the UNIQ® JET products will achieve below performance:

- Lower particle size and narrower particle size distribution
- Stable low viscosity (Newtonian viscosity)
- Excellent storage stability in viscosity and particle size
- Better color property of the prints
