

UNIQ[®] LIGHT 923

Hindered Amine Light Stabilizer

General **UNIQ[®] LIGHT 923** is a new liquid hinder amine light stabilizer especially developed for coatings. It is based on an aminoether function which prevents possible interactions with acidic paint ingredients such as catalysts. The efficiency of **UNIQ[®] LIGHT 923** provides significantly extended life time to coatings by minimizing paint defects such as cracking and loss of gloss.

The performance of **UNIQ[®] LIGHT 923** can be significantly improved when used in combination with a UV absorbers such as **UNIQ[®] LIGHT 930** and **UNIQ[®] LIGHT 984**. These synergistic combinations give coatings superior protection against gloss reduction, cracking, blistering, delamination and colour change.

Possible interactions of **UNIQ[®] LIGHT 923** with paint ingredients such as acid catalysts should be carefully evaluated.

Special Features

- Liquid
- Suitable for solvent-, water based and UV coatings
- Suitable for clear and pigmented coatings
- Minimize paint defects like crack and loss of gloss

Application

Architectural coatings	■
Wood and furniture coatings	■
Automotive and refinish coatings	■
Can/coil coatings	■
Protective coatings	■

highly recommended ■

recommended □

Product Specification

Viscosity	3000 mPas
Density 20°C	0.97 g/cm ³
Color	Light yellowish liquid

Addition levels

OEM/Refinish coatings	1.0 – 3.0 %
Industrial coatings	0.5 – 2.0 %

Packing

- 25 kg
- 190 kg

Shelf life

UNIQ[®] LIGHT 923 should be stored in a cool dry place. When kept in an original unopened container, it will keep up to 2 years from the date of manufacture.
