

UNIQ[®] SPERSE 700 S

Pigmentary dispersing synergist

UNIQ[®] SPERSE 700 S is a pigmentary dispersing synergist used in combination with UNIQ[®] SPERSE 500 and 600 series high molecular weight dispersing agents to improve the pigment dispersion, stability and color development. The synergist is mainly suitable for black, green, blue and violet pigments. Recommend for grinding phase used.

Special Features

- Solvent borne applications
- Excellent dispersant for organic blue, black, green pigments
- Gives good viscosity reduction
- Improves transparency
- Improves color development
- Reduce or protect color flooding and floating

Application

Wood and furniture coatings	<input type="checkbox"/>
Automotive and refinish coatings	<input checked="" type="checkbox"/>
Can/coil coatings	<input checked="" type="checkbox"/>
Pigment concentrates	<input checked="" type="checkbox"/>
Protective coatings	<input type="checkbox"/>

Product Specification

Active ingredients	100 %
Density 20°C	1.26 g/cm ³
Appearance	Bluish powder

Addition levels

Amount of synergist additive in conjunction with HMWD agents in ratio 1:2, 1:4 and 1:9

The above recommended levels can be used for orientation and needs to be optimized by testing.

Packaging

- 10 kg

Shelf life

UNIQ[®] SPERSE 700 S should be stored in a cool dry place. When kept in an original unopened container, it will keep up to 3 years from the date of manufacture.
